

Syllabus Mapping for Instructors

Syllabus mapping is a free service provided by JoVE's subject-matter experts - scientists with advanced degrees across a range of disciplines. Faculty receive customized, shareable playlists of JoVE videos aligned with their course syllabus or lab training program.

All JoVE syllabus maps are delivered as digital playlists. Playlists are the most convenient and user friendly way to streamline teaching, training and research with JoVE. Learn more about playlists [here](#).

BENEFITS OF MAPPING

-  JoVE curates syllabus-relevant content, saving you time and streamlining your lesson planning
-  JoVE videos are suitable for any learning environment, with playlists that can be easily reused once created
-  JoVE-created playlists are flexible—they can be edited, updated, and reused

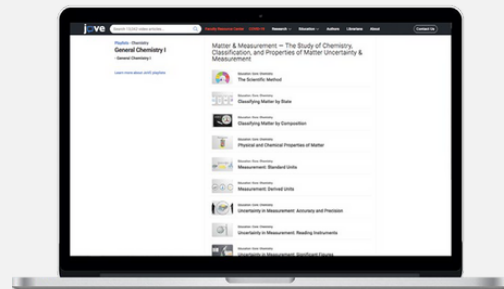

I have made extensive use of the General Chemistry playlist, which offers short videos covering the entire course content. JoVE supports both lecture and lab environments effectively."

— **Richard Jarman**, Professor of Chemistry,
College of DuPage, USA

INTEGRATE VIDEOS INTO YOUR LMS

Find step-by-step instructions for integrating JoVE content into popular LMS platforms in our [Faculty Resource Center](#).
